Author Index to Volume 1

Armijo, J. S., 171

Bridges, D. W., 279
Brückman, A., 241

Croll, J. E., 55

Dereń, Jerzy, 73
Douglass, D. L., 127

Fassell, W. M. Jr., 279

Gilewicz-Wolter, J., 241

Hobby, M. G., 23
Hopkins, G. D., 209

Jarzebski, Z. M., 267

Lindblad, N. R., 143
Logani, R., 3

Mrowec, S., 93, 241, 267

Nowotny, Janusz, 73

Orman, S., 199

Picton, G., 199

Ritchie, I. M., 209
Ruckman, J. C., 199

Sanders, J. V., 209
Sheasby, J. S., 121
Smeltzer, W. W., 3
Strafford, K. N., 221

Walec, T., 93
Wallwork, G. R., 55
Werber, T., 93
Wood, G. C., 23

Subject Index to Volume 1

Adsorption
  CO_2 on Fe–Si, 12
  influence on kinetics, 283
  influence on work function, 73
  O_2 on NiO, 73
Anisotropy of oxidation, 129
Autoradiography
  S^{35} in Ag_2S, 250
  S^{35} in sulfides on Fe–Cr, 93

Chemical potential
  Ag in Ag_2S scales, 252
  in spinels, 183
Cleavage steps, tellurium, oxidation of, 209
Coatings, aluminide-coated
    superalloys, 143
Complexes, in NiO, 272

Defect structure
  CoO, 289
  Cu_2O, 285
  Fe–Cr sulfides, 112
  NiO, 267, 281
  spinels, 175
  vacancies, 279
Design of high-temperature alloys, 55
Diffusion, in spinels, 175
Doping
  effect on work function, 73
  NiO doped with Li_2O, 73

Failure, of aluminide coatings, 167
Fayalite scales, 3

Hot corrosion, 160

Kinetics
  derivation of rate law, 279
  effect of Ni on Fe–Cr oxidation, 23
  oxidation of aluminide-coated
    superalloys, 143
  oxidation of Fe–Cr–Ni, 23
  oxidation of Fe–Si, 3
  solid state spinel formation, 171
  sulfidation of Ag, 246
  sulfidation of Ag–Zn, 249
  sulfidation of Fe–Al, 224
  sulfidation of Fe–Cr, 93

Mechanical properties of coated
    superalloys after oxidation, 162
Microprobe analysis
  Fe–Al sulfide scales, 231
  Fe–Cr–Ni oxide scales, 30
  Fe–Cr sulfide scales, 102
Morphology
  aluminide-coated superalloy scales, 155
  Fe–Al sulfide scales, 228
  Fe–Cr–Ni oxide scales, 27
  Fe–Cr sulfide scales, 105
  FeO, 140
  Ni–Cr oxides scales, 61
  NiO, 139
  niobium oxides, 121
  scales, 138
  sulfide scales, 243
  tellurium oxide films, 211

Niobium oxide
  morphology of scales, 121
  transformation during oxidation, 121

Parabolic oxidation, 279
Plasticity
  effect of stoichiometry, 135
  effect of temperature, 136

Plasticity—*contd.*
Fe–Cr sulfides, 112
properties of thin films, 136
the role of in oxidation (review), 127

Quaternary systems, Fe–Cr–Ni–O, 68

Spalling of films, 134
Spinels
aluminates, 187
chromites, 191
defect structure of, 175
Fe–Cr–S spinel, 111
Fe–Ni–Cr–O spinels, 65
kinetics of formation, 171
mechanism of formation, 171
Ni–Cr spinel, 58

Stresses in films, 131, 133
Sulfidation
effect of inert phases, 251
Fe–5Al, 221
Sulfidation—*contd.*
Fe–Cr alloys, 93
mechanism of, 93, 247
plasticity of scales, 242, 264
silver, 241
silver–zinc alloys, 241
Superalloys, oxidation of aluminide-coated, 143

Tellurium, oxidation of cleavage faces, 209
Ternary systems, Ni–Cr–O, 58

Uranium, oxidation of, 199

Vacancies, 237, 267, 279

Wagner mechanism, sulfides, 113, 237
Wagner pellet method, 241
Wagner–Schmalzried spinel theory, 182
Work functions, 73
Wüstite scales, 3

CONTENTS

Vol. 1, No. 1 **Autumn 1969**

Editorial 1

Kinetics of Wustite–Fayalite Scale Formation on Iron–Silicon Alloys 3
R. Logani and W. W. Smeltzer

The Role of Nickel in the High-Temperature Oxidation of Fe–Cr–Ni Alloys in Oxygen 23
M. G. Hobby and G. C. Wood

The Design of Iron–Chromium–Nickel Alloys for Use at High Temperatures 55
J. E. Croll and G. R. Wallwork

Mechanism and Kinetics of Interaction Between Gaseous Oxygen and Nickel Oxide Surfaces 73
Jerzy Dereń and Janusz Nowotny

High-Temperature Sulfur Corrosion of Iron–Chromium Alloys 93
S. Mrowec, T. Walec, and T. Werber

An Oxide Transformation Phenomenon Observed During the Oxidation of Niobium 121
J. S. Sheasby

The Role of Oxide Plasticity on the Oxidation Behavior of Metals: A Review 127
D. L. Douglass

A Review of the Behavior of Aluminide-Coated Superalloys 143
N. R. Lindblad

Vol. 1, No. 2 **Winter 1969**

The Kinetics and Mechanism of Solid-State Spinel Formation—A Review and Critique 171
J. S. Armijo

Uranium Oxides Formed in Air and Water in the Temperature Range 200–375°C 199
S. Orman, G. Picton, and J. C. Ruckman

The Structure and Oxidation of Cleavage Faces of Tellurium 209
G. D. Hopkins, I. M. Ritchie, and J. V. Sanders

The Scaling Behavior of an Iron–5% Aluminum Alloy in Sulfur Vapor 221
K. N. Strafford and R. Manifold

Application of Wagner's Pellet Method in Investigating the Mechanism of Formation of Heterophasic Two-Layer Scales on Alloys 241
A. Brückman, J. Gilewicz-Wolter, and S. Mrowec

Defect Structure Model for Nickel Oxide 267
Z. M. Jarzębski and S. Mrowec

Parabolic Oxidation of Metals to Metal Deficit Oxides 279
D. W. Bridges and W. M. Fassell, Jr.
